

Cover Letter — Senior Marketing Analyst | Glow25

Boru Lai Lüneburg, Germany | leonlai0524@outlook.com | +49 15236845456

Glow25's mission to redefine how women experience aging — and the data-driven, direct-to-consumer engine powering that mission — is exactly the kind of challenge I want to work on. What draws me in is not just the e-commerce growth story, but the company's commitment to building something genuine: a brand where analytical rigour and authentic customer relationships reinforce each other.

My most directly relevant experience is at Moli Media, a live-stream e-commerce agency where I owned end-to-end funnel analytics across events reaching 4,000+ attendees. I tracked audience cohort behaviour from top-of-funnel engagement through to revenue attribution, produced post-event performance reports covering drop-off signals and retention patterns, and used those insights to sharpen targeting and format decisions for subsequent campaigns. That work sits at the intersection of DTC conversion analysis and audience lifecycle thinking — the same analytical mindset Glow25 needs to optimise its subscription model, understand CLTV, and reduce CAC across channels.

Complementing that, at Intelligent Power Corporation I built multi-market campaign ROI frameworks tracking spend attribution across 4 product launches, and at Hapag-Lloyd I analysed customer journey funnel data to surface friction points that directly shaped product backlog priorities. Across both roles, the core discipline was the same: translate messy behavioural and performance data into decisions stakeholders could act on. I recognise that GTM and GA4 hands-on implementation are core to this role, and while my current stack centres on Power BI and Looker Studio, I am actively building my GA4 and tagging knowledge and am committed to closing that gap quickly.

I would welcome the chance to discuss how my funnel analytics and cohort analysis experience can contribute to Glow25's growth — and how I can grow into the full technical stack alongside the team.
